

capabilities, a fleet of trucks for expedient delivery and pickup, repackaging and labeling technology and value-added services like export documentation.

A critical link in its customers' cold chain, Confederation Freezers has grown from a single 1,200,000-cubic-foot facility in Brampton, Ontario, to an operation encompassing over 20 million-cubic-feet, 250 clients from four refrigerated and ambient temperature warehouses located throughout Ontario. Its integrated array of services ensures flexibility and variety in the available methods of storage and transportation services provided.

"Our success has relied on a combination of experience and commitment, which ensures reliability, efficiency and excellent service quality," says Harry Greenspan, president and CEO of Confederation Freezers. "We have a record of many industry firsts: providing electronic data interchange (EDI) to customers, operating 24 hours-a-day, RF inventory track, distribution services and HACCP (Hazard Analysis and Critical Control Point) recognition. Our customers recognize our innovation and we are dedicated to meeting their needs."

**CUSTOMER ADVANTAGE**

Confederation Freezers' customers span the full continuum of the food industry. The company's rich history in refrigerated warehousing, coupled with enhanced networks of transportation, communications, operational and technical resources, enables it to continually improve performance and provide superior service.

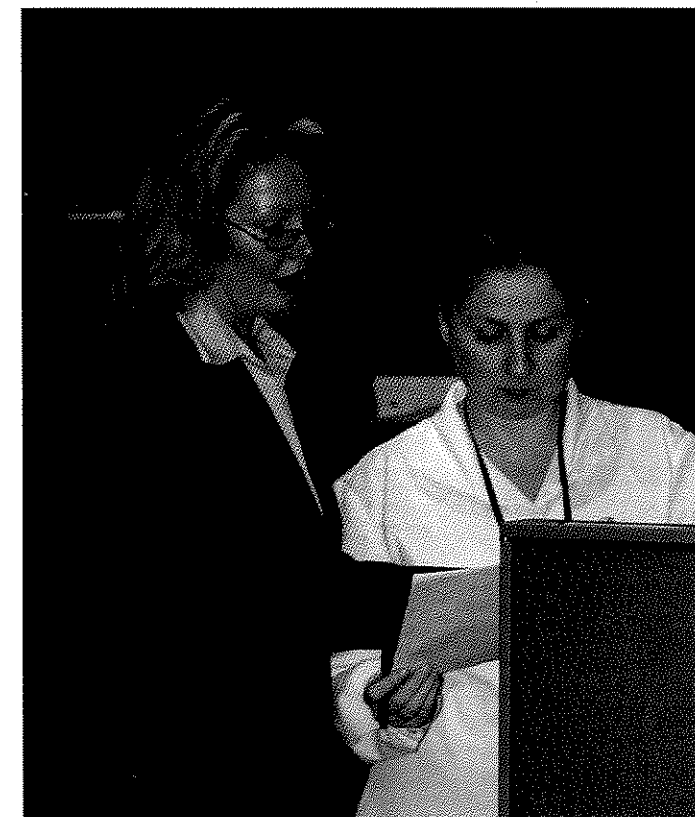

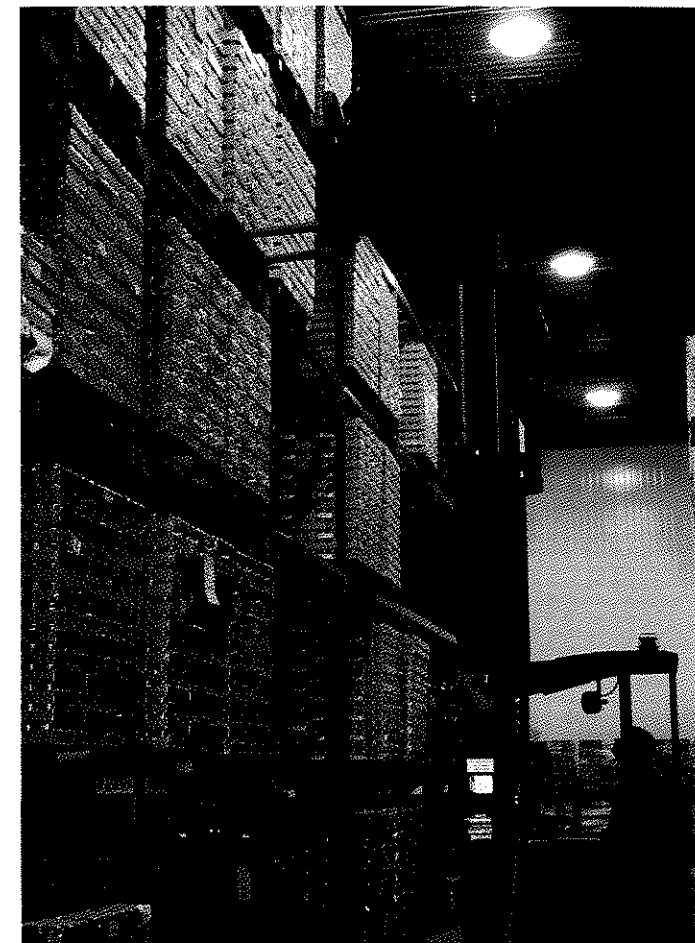

Confederation Freezers' multi-temp storage facilities are equipped with state-of-the-art refrigeration systems capable of providing temperatures ranging from -29C (-20F) to +5C (+40F). Ambient storage is also available and customers can rest assured that each facility is monitored 24 hours a day, guaranteeing product safety and security.

Facility services include re-inspection and RF capabilities, bar coding, case/palette scanning, slip sheet and drum handling, rail siding, tempering, loading/unloading containers and stamping, labeling and repacking.

All four Confederation Freezers' locations are Canadian Food Inspection Agency certified. In addition, the facilities are recognized by HACCP, a systematic preventative approach to food safety, and the Workplace Hazardous Materials Information System (WHMIS). The premises are USDA registered and audited annually by the American Sanitation Institute.

Confederation Freezers' temperature-controlled fleet of trucks offers reliable and accurate transportation services equipped with the technology to ensure just-in-time needs are met. The company offers daily services within Ontario and Quebec, as well as service to Western Canada, the Maritimes and the U.S. Additional transportation services include freight management and consolidation, cross docking, customs documentation, cross-country delivery/pickup and 24/7 pickup/delivery services.

Creating value and providing additional services to customers is a Confederation Freezers' hallmark "The value-added services we offer customers give them a higher competitive advantage," says Alan Greenspan. From re-packaging and re-labeling, to customs documentation, the company's value-added services are plentiful. They include: cycle counts, room freezing, blast freezing, multi-customer third-party logistics billing, picking, customer access, auto-faxing, cross docking, take weights, and case picking.
